

## Commitment to Environmental Sustainability

At Leiters Health, we recognize our responsibility to minimize our environmental impact and contribute to a more sustainable future. Through various initiatives, we are committed to energy efficiency, waste reduction, and sustainable operations.

### Our 2024 Achievements

- 37% of our electricity was generated from green sources.
- 176 metric tons of cardboard and paper were successfully recycled.

### Energy Efficiency and Conservation

- LED lighting has been installed throughout our facilities to reduce energy consumption.
- Smart building automation with sensors to control lighting and HVAC systems.
- HEPA filters to maintain cleaner air, reduce HVAC workload and conserve energy.
- Zoned heating and cooling for optimized energy efficiency.
- Energy Star-rated appliances used throughout our operations.
- Low emissivity glass to reflect infrared light, improving insulation.
- Flat white roof design that reflects sunlight, reducing energy usage.

### Water Conservation and Waste Reduction

- Low-flow fixtures in bathrooms to support water conservation efforts.
- Recycling containers available in every breakroom, cubicle, office and throughout our facilities to encourage waste reduction.

### Additional Efforts

- Food/snack kiosks onsite to reduce carbon footprint from employee travel during lunch periods.
- Actively exploring electric vehicle charging stations to support sustainable commuting.

Our commitment to sustainability is ongoing. We continue to seek innovative ways to reduce our environmental impact while delivering high-quality healthcare solutions. Together, we are making a difference for our planet and future generations.
